TOPTRACER RANGE ™
## SETTING UP ON THE RANGE

LOCATING YOUR POSITION ON THE RANGE

Hit the green **PLAY NOW** button and select Mobile*

Select the **LOCATE POSITION** button

Using a wedge club, hit a shot to let the cameras know where you are located on the range

Determine which trace is yours on the colored shot map. Tap that circle and then confirm "**YES IT'S ME**"

You are now ready to play the games!

PRO TIP!

When hitting your "locating shots", aim to the right or left side of the range to help easily identify your spot on the range

If the app does not automatically recognize the range you are at, ensure your location settings are turned on while using the app, or you can manually search the range by name.

3. Toggle **Limit IP Address Tracking** to the off position
4. Re-open the Toptracer app to try and connect

OTHER HELPFUL HITS (iPhone)

▶ CONFIRM TOPTRACER APP CAN CONNECT TO LOCAL NETWORK:
Settings > Toptracer App > "Local Network" toggle should be set to on position

▶ NO VPN CONNECTIONS
Settings > General > VPN & Device Management > VPN Not Connected

OTHER HELPFUL HITS (Android)

▶ RESTART THE PHONE & OPEN TOPTRACER APP
Our App Team has notified us that Androids do not automatically update apps like iPhones do when connected to the charger overnight. Therefore, a full restart can help reboot the app and improve connection

▶ NO VPN CONNECTIONS
If you have downloaded a VPN app on your phone and have it turned on, you will not be able to connect to the Toptracer Wifi. Locate the VPN app on your phone and turn that setting off.
